DAILY EXCITING HIGHLIGHTS

Two forum stages (Hall 1: Tube and Hall 13: wire)
With daily forums, specialist presentations and live demonstrations: Perfect for direct dialogue between manufacturers, users and researchers.

Plastic Tubes & Pipes Area (Hall 1)
Following its successful debut in 2024, you will once again find concentrated plastic pipe expertise along the entire value chain.

World of Cables (Hall 13)
A new special section, which puts the end products in the spotlight. Because without cables nothing works – neither high-tech nor sustainability.

THE FUTURE TOPICS IN FOCUS

KI & Robotics
Discover how intelligent automation, machine learning and modern robotic systems make production processes more efficient and safer.

Energy Transition & Renewable Energies
See forward-looking solutions for hydrogen infrastructure, CO_2 transport, photovoltaics and wind power, and learn which key factors are driving the development of renewable energy sources.

FIND FURTHER PRODUCT CATEGORIES FROM WIRE AND TUBE

HIGH POTENTIALS

ONE EVENT, MANY JOB OPPORTUNITIES

Ready for Take-off? The High Potentials Day at 16 April 2026 marks your entry into the industry of the future.

NEW: Come by in the High Potential Area in the foyer of the north entrance.

eco Metals
SUSTAINABLE PROCESS SOLUTIONS

PIONEERS OF SUSTAINABILITY

Follow our digital ecoMetals Trail to exhibitors with pioneering innovations for environmentally friendly products, production and processes.
